New – Sunray Publications Relocation Data Now Available for Web Use

PHOENIX June 2006 — Sunray Publications is pleased to announce the availability of its complete database of information for web licensing use.

For the first time in its 25 year history, Sunray is making its complete database of information available to its clients. Until now Sunray's data has only been available through its printed or CD-ROM Relocation Guides. Now the data can also be licensed for use on corporate web sites.

The relocation and community information that is typically found in Sunray's products is available in several formats for use, including:

- PDF Data files
- RAW Data (for formatting to a corporate web site)
- In select markets – full on-line versions of Sunray's CD-ROM guides.

The information can be licensed on a per market basis and can be tailored to meet a clients needs. Pricing for the electronic data is also based on an annual fee.

This can be a very cost effective addition to a company web site, offering detailed information to relocation clients as well as home buyers visiting a company's web site.

Currently Sunray has several clients already under contract to take advantage of this new and exciting way of presenting detailed community information to relocation clients and home buyers alike.

Call or e-mail Peter Conti or Holly Brownstein for pricing information and for sample web links.

Anchored by the hallmarks of accuracy and quality, and with more than 25 years in business, Sunray Area Guides consistently meet and surpass the expectations of the nation's leading relocation professionals. For more information on Sunray Publications and our complete product portfolio, contact Peter Conti or Holly Brownstein at 800-947-5161 or via E-mail: peter@movinginformation.com, holly@movinginformation.com.
